Submission Preparation Checklist

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authors that do not adhere to these guidelines.

- The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).
- The submission file is in OpenOffice, Microsoft Word, or RTF document file format.
- Where available, URLs for the references have been provided.
- The text is single-spaced; uses a 12-point font; employs italics, rather than underlining (except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end.
- The text adheres to the stylistic and bibliographic requirements outlined in the Author Guidelines.
- Please be sure the submission of the final manuscript meets the standards provided in the Publication Manual of the American Psychological Association (referred to here as APA Manual; 6th ed. is preferred, but 5th ed. is acceptable), with the exceptions specifically for Human Technology noted in the Final Manuscript Preparation Details.
- Is the manuscript organized with the required elements in the following order:
 - Manuscript's title
 - manuscript's running title
 - the names and affiliations of all authors
 - a 120-150 word abstract
 - 4-6 keywords/phrases
 - the body of the text
 - endnotes (if needed)
 - reference list
 - author's note (if needed) and correspondence information
 - and tables (with titles) and figures (with captions) in sequential order
 - appendixes (if needed).
- Is the manuscript text provided in single-spaced, one-column format?
 - Are the margins as specified? (For A4, in cm, 3.8 at the top; 3.7 at the bottom; and 2.54 on each side. For USA letter, in inches, 1.5 at the top; .75 at the bottom; and 1 on each side)?
 - Is the font used for manuscript text portions 12-point Times New Roman and the text fully justified?
 - Are all pages numbered (centered in the footer)?
 - Are tabs (.75 cm or .3 in) created through the software program and not through the space bar?
 - Is the hyphenation option turned off in the software program?
 - Is the quality of English sufficient for publication in an international journal?
 - If the text contains endnotes, are they noted appropriately within the article and specified at the end of the text?
 - Are all direct and indirect quotes cited properly (author, publication year, and page number) and paraphrased quotes noted with author and publication year, and included in the reference list?
 - Are the reference citations in the text created to meet the standards provided by the APA Manual and correspond exactly with their counterparts in the Reference List?
 - Are the headings used created according to the Human Technology style, in 12-point Arial, created without use of the software's formatting option and reflect the organization of the article?
 - Are abbreviations used only when necessary and properly defined on first use?
 - Are statistics and symbols used according to APA Manual standards?
 - Are all measurements, other than time, provided in metric standards or provided with metric equivalents if nonmetric units were used in the experiment?
 - Are locations for tables and illustrations noted clearly within the text?

Are all statistical texts and abbreviations presented clearly, accurately, and in correct form?

Is the reference list prepared according to the Human Technology format (modified APA Manual style: alphabetical order by surname, italics for publications, page numbers when needed, etc.)? Are URLs for any Internet references still active?

Are all references in the reference list mentioned as an in-text citation within the body of the text?

Are issue numbers included for journals in which each issue of a volume starts with page 1?

Is an author's note needed? If so, does it follow the stated guidelines?

Have you included correspondence information (contact name, affiliation, postal address, and email address) for the author of contact?

Are all tables and illustrations created using Arial font, 8-11 points, and the details of images and text sharp enough to see/read both in print form and on the screen?

Are all illustrations and tables numbered consecutively in the order they are mentioned in the text and properly titled/captioned?

Are any abbreviations used in the table/figure fully explained in the legend, title, or note?

If needed, has written permission to reprint copyrighted materials (texts, tests, tables, or illustrations), in whole or in part, been secured by the author and submitted to Human Technology?

If needed, has written permission been secured for individuals within photographs in which they are visually identifiable?

Author Guidelines

Human Technology accepts manuscripts meeting the aim and the scope of the journal (see the Mission Statement) on an ongoing basis, in addition to manuscripts submitted for thematic issues.

Manuscripts should be submitted to the [journal's managements system](#).

Template HT

Manuscripts (written in good English and in line with the style provided in the *Publication Manual of the American Psychological Association*, 6th edition [APA style] and summarized in [Manuscript Preparation Details](#)) should be submitted in either the Word (.doc or .docx) or rich text format (.rtf) format. In submitting a manuscript for publication consideration in *Human Technology*, authors agree to having their papers evaluated by an online antiplagiarism program before being assessed by the editor in chief regarding the suitability of the paper's topic for the scope of our journal and its readiness for peer review. (For papers submitted to special issues, papers' topics must also be in line with the scope of the issues' theme and the above areas are assessed by the guest editors.) Manuscripts taken into publication consideration will be subject to a double-blind peer review process; papers accepted for publication are subjected to copy editing.

In addition, the editors of *Human Technology* expect that authors of submissions have abided by internationally accepted ethical standards in regard to research practices and manuscript preparation. More information can be found in the [Ethical Standards](#) area of this website.

ACADEMIC ETHICS POLICY AND GUIDELINES

The names and email addresses entered in this journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party.

The Editorial Board strictly follows all guidelines and recommendations issued by COPE - Committee on Publication Ethics (more details: <https://publicationethics.org/resources>).

More specifically, we would like to emphasize the attention of all authors (current and prospective), all reviewers, in-house and guest editors to the following provisions under COPE which we treat as the most essential for our work:

- All editors - in-house, acting, managing and guest - are responsible for maintaining the balance of high-quality materials published, freedom of expression and academic integrity
- High standards of research conduct and academic publishing shall always go first, prior to commercial interests and needs of the editorial team and publishers of the journal
- At any point of time the authors of already published materials have the right to contact the editorial team with the request of retraction, publishing apology, clarification or correction. The editor shall fully support this decision of the authors, however, they may also request additional explanation before publication and/or retraction. The time and the issue of publishing additions/apology/clarification is to be determined by the editors depending on the technical capacities of the editorial office.
- Editors of the journal are responsible for determining whether the text fits the journal's scope and general framework. The decision that the text does not fit either of them or both should be provided to the author(s) along with the explanation why so and (optional) recommendation on alternative publication options.
- Originality of the ideas and importance/relevance of the research output presented in an article are treated as the top-priority criterion when the text is considered for publication.
- Editors of the journal are responsible for explaining the details on the double-blind peer-review procedures to both the authors and the reviewers. Every time the reviewer gets the text for a blind review, they also get a reminder on rules and procedures accepted by the editorial team.
- Editors of the journal are responsible for revision of academic publishing rules and double-blind peer-review standards on the annual basis (at least once a year; additional changes can be introduced if the world standards and/or COPE regulations change).
- Newer editors shall not reverse the decision of previous editors, unless there is an external complaint filed about plagiarism or other misconduct.
- Editors are responsible for making sure the peer-review process is properly encoded and that neither the author, nor the reviewer are able to detect the identities on the opposite side.
- In case a complaint is filed by an author, a review or a reader of the journal, the editors shall follow the appropriate COPE procedures, using similar cases described on the COPE site as the benchmark in the field.
- Articles containing criticism of various previous works, encouraging academic debate and/or presenting negative results should be treated equally to more traditional types of articles describing authors' own results. Articles of this sort are also subject to standard double-blind peer-review.
- All editorial rules and academic standards imposed and followed by the Editorial Board are similarly applicable to both published and unpublished (still under consideration) texts.
- In case the editors detect the case of plagiarism and have all the evidence to prove it - they maintain the right to contact the author's employer, the related Ministry of Education and/or other appropriate authority (depending on a country and a specific case) and report the case of plagiarism.
- In case plagiarism or other misconduct have been reported externally, the editors are expected to fully cooperate on the case and provide all evidence they have on the case, apart from the identity of the involved reviewers.
- Editors shall be responsible for informing the international databases and catalogues on the cases of retraction. However, they cannot be responsible for the timing of the related updates in these databases and catalogues.
- Editors and publishers of this journal are expected to communicate following the principles of editorial independence. Despite the fact that editors are officially hired (or invited on the pro bono basis) to work in the editorial team, all decisions made by the editors are expected to be based solely on the quality and content of the provided texts and be independent from economic relations within the office or current political situation in the country/region.
- The journal prefers to restrain from any sort of advertising activities as such and concentrate on academic publishing solely. In exceptional cases advertisement still can be published. The decision on advertisement publication shall belong to publishers, not editors of the journal. Published advertisement shall be directly related to the fields of academic research, higher education and conferences within the scope and topics of the journal itself.
- All situations presented as the conflict of interests shall be resolved according to COPE regulations. In such situations editors and/or publishers are expected to find a relevant case among those described on the COPE site and take action

accordingly.

- In case an author, a reviewer or a reader plans to file a complaint regarding the journal's activities, they are kindly asked to contact the related editor as the first instance. In case the filer of the complaint disagrees with the decision and/or explanation provided by the editor - they are asked to contact the publisher. The publisher has the right to disregard the complaint if the filer did not try to settle the case with the editor first.

EDITORIAL PRIVACY POLICY AND GDPR COMPLIANCE

Both Editorial Board and editorial team are strongly committed to maintain trustful relations with all the authors, current and prospective, as well as with all the reviewers.

We have updated all our rules and internal regulations so that to fully comply with the GDPR policies.

As of today, the key provisions of the editorial privacy policy are as follows:

- Editors that are in direct communication with the authors (online and/or offline) are responsible for keeping all personal data confidential.
- Neither the Board, nor the editorial team have technical capacities to track data from third-party sources.
- The Editorial Board and the editorial teams shall not use any personal data provided by authors and/or reviewers for own personal purposes, including those of purely research/academic nature.
- If the Board and/or editorial team conduct a survey, authors/reviewers/readers participating in it would be informed in advance and would be asked to provide their permissions.
- The Board and/or the editorial team shall share personal information on the authors strictly in the cases when plagiarism or other misconduct has been detected and there is an ongoing investigation. In such a case the Board and the editorial team are expected to be fully cooperative and contribute to the investigation.
- Authors' current work affiliation and contact emails are published on the first page of each article and are treated as part of open-access information. If any author would NOT like to see their email published - they shall inform the editorial team about this decision at least 3 business days prior to the date of the article going online.
- Since author's work affiliation is integral part of articles' indexation in the international databases and catalogues, this information is treated as open-source data and all the authors are strongly encouraged to provide it during the submission of their texts.
- The Editorial Board and the editorial team shall not share personal contact information (such as phone numbers, emails, skype names and the like) with third parties.
- The Editorial Board and the editorial team shall not attempt to track the IP addresses of any senders establishing communication with the journal.
- Communication with the members of the Editorial Board and the editorial team using social networks is strongly discouraged. We ask all our authors, reviewers and reader to respect the privacy of our employees and partners and do not seek communication with them via the informal sources such as Facebook, Linkedin and the like.
- The minimum term of any personal data retention is 1 years calendar year since the day of the first contact.
- The editors of the journal maintain the right to delete any personal data on the authors and/or reviewers they consider unnecessary anymore.
- If any person/organization receives an email from the Board or the editorial team due to technical error or human mistake - we ask them to delete the email as soon as possible and notify the editorial office at earliest.

➤ If you have a specific enquiry about how we collect and save data - please, contact our managing editor. If you want all your personal data be deleted from our internal database - please, contact our managing editor.
